INVITATION LETTER

Hosted by the Department of City and Regional Planning at Gazi University, this international conference is organized in celebration of the 100th Anniversary of Gazi University.

The conference brings together scholars, practitioners, policymakers, civil society actors, and young researchers to explore how accessibility, active mobility, and neighborhood-based planning can foster more inclusive, livable, and sustainable cities.

Focusing on neighborhood-scale planning, everyday mobility, and people-centered urban environments, the event responds to growing inequalities in access to urban opportunities. By integrating the principles of Chrono-Urbanism, the conference also examines how time, daily rhythms and temporal resources shape accessibility and urban life.

You are cordially invited to participate in the international conference "Urban Neighborhoods Within Reach: Accessibility, Active Mobility and 15-Minute Cities" hosted by Gazi University at the Rectorate Building in Ankara.

Join us to bridge research, policy, and practice and to contribute to discussions shaping the future of urban planning as we look toward the next century.
