

Springer Nature Open Access License Guide

Creative Commons License (CC-BY) - Factsheet

What is a Creative Commons License?

[Creative Commons \(CC\)](#) provides free and easy-to-use copyright licenses giving the public the right to share, use, and even build upon an author's creative work. The non-profit organization CC also protects the people who use an author's work, so they don't have to worry about copyright infringement as long as they abide by the specified conditions. Licensing OA articles under a Creative Commons license has evolved as the standard for Open Access publishing.

The CC BY NC Attribution

Under this license, you are free to copy and redistribute the material in any format and also adapt, remix and build upon the work, provided you give appropriate credit to the original source, provide a link to the license and indicate if changes were made. You may not use the material for commercial purposes.

Open Access licensing in Springer Nature journals

Open access (OA) articles in Springer Nature journals are published under Creative Commons licences. These provide an industry-standard framework to support easy re-use of open access material.

Our preferred licence is the CC BY license, and all Springer Nature-owned journals with open access options offer the CC BY licence. The CC BY licence is considered the industry 'gold standard' for open access and also preferred by many funders. A very small number of journals, including those published under the [Adis](#) imprint, continue to use the [Creative Commons Attribution Non-Commercial 4.0 International Licence \(CC BY-NC\)](#) as their default licence.

For more information on OA licensing, please visit our [Journal policies](#) page.

How Springer Nature helps authors ensure compliance to funder requirements

Authors are advised to check their funder's open access requirements, to ensure compliance. Many institutions and research funders worldwide have introduced policies requiring researchers to ensure that their publications are openly accessible. Our [FAQ page](#) provides guidance on how authors can meet OA policy requirements of their funders and institutions when publishing their articles.

How Springer Nature informs authors about OA licenses

After publication, the author will receive an email, containing information about the respective OA license.

Creative Commons License (CC-BY) - Factsheet

Congratulations

Dear corresponding author

We are pleased to inform you that your article has just been published:

Title

cc by nc article

Journal

Osteoporosis International

DOI

10.1234/A115E92B-2057-47A0-A55A-0CD58283E9BA

Publication Date

2020-11-27

After publication, the author receives an email about the respective OA license

Your article is immediately, and freely available online

Your article is available online here <https://link.springer.com/article/10.1234/A115E92B-2057-47A0-A55A-0CD58283E9BA> or as a PDF here <https://link.springer.com/article/10.1234/A115E92B-2057-47A0-A55A-0CD58283E9BA.pdf>.

Your article is published under the Creative Commons Attribution Non-Commercial license which allows users to read, copy, distribute and make derivative works for noncommercial purposes from the material, as long as the author of the original work is cited. All commercial rights are exclusively held by Springer-Verlag London Ltd. part of Springer Nature. You may self-archive this article on your own website, an institutional repository or funder's repository and make it publicly available immediately.

How can I share my article?

Your final article (Version of Record) may be shared anywhere, at

any time, by you or by anyone providing they observe the terms of CC BY and credit you as author, as described above.

So whether you want to share your article on a website, a scholarly collaboration network, by email, on social media, in teaching, or anywhere else, you're free to do so!

Announce your publication

We encourage you to forward this email to your co-authors.

Additionally we recommend you mention your article's publication and its DOI on your website or your social media profiles.

Citation Information

Your article can be cited by its DOI 10.1234/A115E92B-2057-47A0-A55A-0CD58283E9BA in the following form:

Author, Journal Title, Year, DOI

Author services to amplify your research

From video abstracts to article metrics to research data support, find out about the author services and how these could benefit you and your research.
