COURSE DESCRIPTION FORM									
Course Code and Name	CENG464 MULTIMEDIA SYSTEMS (TECH.ELECT.)								
Course Semester	8								
Catalogue Data of the Course (Course Content)	Architectures for multimedia systems, digital audio, image technology and image compression, computer graphics, multimedia information systems, multimedia communication systems, structure of the Internet, the methods of data storage and data access on the Internet.								
Course Textbooks	1. Multimedia Networks: Protocols, Design and Applications, Hans W. Barz, Gregory A. Bassett, Wiley, 2016.								
Supplementary Textbooks		damentals of Multimedia, Ze-Nian Li and Mark S. Drew, Prentice-Hall, 2003. Itimedia Systems and Techniques, Furth Borko, Springer, 1996.							
Credit (ECTS)	6								
Prerequisites for the Course (Attendance Requirements)	There is no prerequisite or co-requisite for this course.								
Course Type	Technical Elective								
Language of Instruction	English								
Course Objectives	To teach the topics of architectures for multimedia systems, digital audio, image technology and image compression, computer graphics, multimedia information systems, multimedia communication systems, structure of the Internet, the methods of data storage and data access on the Internet.								
Course Learning Outcomes	1. Explains the topics of architectures for multimedia systems, digital audio, image technology and image compression, computer graphics, multimedia information systems, multimedia communication systems, structure of the Internet, the methods of data storage and data access on the Internet.								
Instruction Method (Face-to-face, Distance education etc.)	The mode of delivery of this course is face to face								
Weekly Schedule of the Course	Week 1: Architectures for multimedia systems Week 2: Architectures for multimedia systems Week 3: Digital audio Week 4: Image technology Week 5: Image compression Week 6: Computer Graphics Week 7: Multimedia information systems Week 8: Multimedia communication systems Week 9: Multimedia communication systems Week 10: Structure of the Internet Week 11: Data storage on the Internet Week 12: Data storage on the Internet Week 13: Data access Week 14: Data access methods								
Teaching Activities (The time spent for the activities listed here will determine the amount of credit required)  Assessment Criteria	Weekly theoretical course hours: 3 Reading activities Internet search and library work Midterm and revision for midterm Final exam and revision for final exam    Number(s)   Weight (%)								
	Midterm exam Assignment	4	40 20						
	Application	0	0						
	Project	0	0						
	Practice	0	0						
	Quiz	0	0						
	Final exam	1	40						

	Total	6			100				
			Number of		ratio	n	End of		
Workload of the Course	Activity		Weeks	`	(Weekly Hour)		Semester Total Workload		
	Weekly theoretical course hours		14		3		VV C	42	au
	Weekly theoretical course hours		0	0					
	Weekly practical course hours		14				0		
	Reading activities		14		3		42		
	Internet search and library work			3			42		
	Designing and implementing materials		0	0			0		
	Making a report		0	0		0			
	Preparing and making presentations		0		0		0		
	Midterm and revision for midterm		1		12		12		
	Final exam and revision for final		1	12			12		
	exam			+					
	Total workload						150		
	Total workload/ 25 Course Credit (ECTS)						6		
Contribution Level			1 a a ma a -	1	1	2	2	6	<i>E</i>
between Course Outcomes	No	Program Ou Knowledge of mathemat			1	2	3	4	5
and Program Outcomes		engineering, computing,							
	1	engineering; ability to use this knowledge in		in				X	
		solving complex engineering problems.							
		Ability to define, formula							
		complex engineering problems using basic science, mathematics and engineering							
	2	knowledge and considering the UN						X	
		Sustainable Development Goals relevant to		)					
		the problems addressed.							
		Ability to design creative solutions to complex engineering problems; ability to							
		design complex systems, processes, devices,							
	3	software, algorithms or products to meet							X
		current and future requirements, considering							
		realistic constraints and conditions.							
	4	techniques, resources and	select, use and develop appropriate						
		engineering and informatics tools, including		ıg					$ _{\mathbf{X}}$
		estimation and modeling, for the analysis and		ind					$ ^{\Lambda}$
		solution of complex engineering problems while being aware of their limitations.							
		Ability to use research methods to examine							
	5	complex engineering pro							
		topics in computer engineering, including reviewing the literature, designing							
						X			
		experiments, conducting experiments, collecting data, analyzing and interpreting							
		results.							
	6	Knowledge of the effects							
		practices and the standards used in these							
		practices on society, health and safety, economy, sustainability and environment							
		within the scope of the UN Sustainable Development Goals; awareness of the				X			
		consequences of enginee		ı the					
	7	fields of information security and law.  Acting in accordance with engineering						X	
	'	professional principles a						Λ.	
		ethical responsibility; awareness of acting							
		impartially, without disci	rimination on any						

		issue, and being inclusive of diversity.		
	8	Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).	X	
	9	Ability to conduct effective verbal and written communication on technical issues in Turkish or English, prepare reports, make effective presentations and prepare software documentation, considering the various differences of the target audience (such as education, language, profession).		
	10	Knowledge of business practices such as project, risk and change management and economic feasibility analysis; awareness of entrepreneurship and innovation.	X	
	11	Lifelong learning skill that includes the ability to learn independently and continuously, to adapt to new and developing scientific practices and technologies, and to think inquisitively about technological changes.		X
Lecturer(s) and Contact Information	Assist. Prof. onerbarut@g	Dr. Öner BARUT gazi.edu.tr
