	COURSE DESC	RIPTION FO	ORM				
	COURSE DESCRIPTION FORM CENG487 MANAGEMENT INFORMATION SYSTEMS (TECH.ELECT.)						
Course Code and Name	· · · · · ·						
Course Semester	7						
Catalogue Data of the Course (Course Content)	Information systems, Computer Based Systems, Database Design and Management, Internet and Electronic Commerce, Information Systems Security and Ethics						
Course Textbooks	Management Information System, Pearson, 2018.						
Supplementary Textbooks	Yönetim Bilişim Sistemleri Teorileri, Efe Akademi, 2021						
Credit (ECTS)	6						
Prerequisites for the Course (Attendance Requirements)	There is no prerequisite or co-requisite for this course.						
Course Type	Technical Elective						
Language of Instruction	English						
Course Objectives	 To gain the ability to define, formulate and solve engineering problems using information systems. To use informatics techniques and modern tools necessary for engineering applications. Defining, formulating and solving engineering problems using information systems. 						
Course Learning Outcomes	 Recognizing the basic components of information systems and understanding technology and management elements under the title of information systems, analyzing different problems when necessary. Understanding the processes of designing, developing and deploying information systems suitable for the purposes of businesses Analyzing what kind of information system solution is required for a given problem. 						
Instruction Method (Face-to-face, Distance education etc.)	This course will only face-to-face training.						
Weekly Schedule of the Course	Week 1: Introduction to Information Systems Week 2: Computer Based Systems Week 3: Computer Based Systems Week 4: Computer Based BS Week 5: Tools Used in the Development of Information Systems Week 6: Database Design and Management Week 7: Information Systems Development Approaches Week 8: Communication and Network Systems Week 9: Internet and Electronic Commerce Week 10: Modern Hardware Platform Trends Week 11: Information Systems Security and Ethics Week 12: Information Systems Security and Ethics Week 13: SQL Week 14: Information System Project Discussion						
Teaching Activities (The time spent for the activities listed here will determine the amount of credit required)	Weekly theoretical course hours: 3 Reading activities Internet search and library work Making a report Midterm and revision for midterm Final exam and revision for final exam						
Assessment Criteria	Midterm exam	Number(s)	Weight (%)				
	Assignment	0	0				
	1 0		· · · · · · · · · · · · · · · · · · ·				

	Application 0			0							
	Project 1				30						
	Practice 0			0							
	Quiz 0				0						
	Final exam 1			40							
	Total		3		100						
	Activity			Number of Weeks	(Duration (Weekly Hour)		End of Semester Total Workload			
	Weekly theoretical course hours		14		3		42				
	Weekly practical course hours		0		0		0				
	Reading activities		14		3		42				
	Internet search and library work		14		2		28				
Workload of the Course	Designing and implementing materials		0		0		0				
	Making a rep	Making a report		2		7		14			
	Preparing an	Preparing and making presentations		0		0		0			
	Midterm and revision for midterm		lterm	1		12		12			
	Final exam a	Final exam and revision for final		1		12			12		
	Total worklo							150			
	Total worklo	oad/ 25						6			
	Course Cred	it (ECTS)							6		
Contribution Level	No		Program Ou			1	2	3	4	5	
between Course Outcomes				cs, science, bas	sic						
and Program Outcomes	1	engineering, o			re in			x			
	engineering; ability to use this knowledge in solving complex engineering problems.										
		Ability to define, formulate and analyze									
		complex engineering problems using basic									
	2	science, mathematics and engineering					X				
		knowledge and considering the UN Sustainable Development Goals relevant to the problems addressed.									
		Ability to des									
		complex engineering problems; ability to									
	3	design complex systems, processes, devices, software, algorithms or products to meet					x				
		current and future requirements, considering									
		realistic constraints and conditions.									
			ect, use and develop appropriate								
			techniques, resources and modern engineering and informatics tools, including								
	4			for the analysi					X		
		solution of co	mplex engi	neering probler							
			eing aware of their limitations.								
			se research methods to examine gineering problems or research								
				eering, includir

			Development Goals; awareness of the onsequences of engineering solutions in the								
		fields of infor									

	7	Acting in accordance with engineering professional principles and knowledge on ethical responsibility; awareness of acting impartially, without discrimination on any issue, and being inclusive of diversity.			
	8	Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).			
	9	Ability to conduct effective verbal and written communication on technical issues in Turkish or English, prepare reports, make effective presentations and prepare software documentation, considering the various differences of the target audience (such as education, language, profession).			
	10	Knowledge of business practices such as project, risk and change management and economic feasibility analysis; awareness of entrepreneurship and innovation.			
	11	Lifelong learning skill that includes the ability to learn independently and continuously, to adapt to new and developing scientific practices and technologies, and to think inquisitively about technological changes.	x
