

COURSE DESCRIPTION FORM			
Course Code and Name	CENG494 SPECIAL TOPICS IN COMPUTER ENGINEERING II (TECH.ELECT.)		
Course Semester	8		
Catalogue Data of the Course (Course Content)	Current topics and developments in computer science and engineering		
Course Textbooks	Proceedings of the IEEE, ISSN:0018-9219		
Supplementary Textbooks	ACM Computing Surveys, ISSN:0360-0300 Information Sciences, Elsevier, ISSN:0020-0255		
Credit (ECTS)	6		
Prerequisites for the Course (Attendance Requirements)	-		
Course Type	Elective		
Language of Instruction	English		
Course Objectives	To teach current issues and developments in the field of computer science and engineering		
Course Learning Outcomes	Explains theoretical and methodological developments in information and computer technologies.		
Instruction Method (Face-to-face, Distance education etc.)	The mode of delivery of this course is face to face.		
Weekly Schedule of the Course	Week 1: Current developments in artificial intelligence Week 2: Current developments in artificial intelligence Week 3: Advanced software technologies Week 4: Advanced software technologies Week 5: Optimization technologies Week 6: Optimization technologies Week 7: Advanced software development Week 8: Advanced software development Week 9: Advanced cyber security Week 10: Advanced cyber security Week 11: Edge, fog and cloud computing Week 12: Edge, fog and cloud computing Week 13: Software-defined networks and the future internet Week 14: Software-defined networks and the future internet		
Teaching Activities (The time spent for the activities listed here will determine the amount of credit required)	Weekly theoretical course hours: 3 Reading activities Internet search and library work Designing and implementing materials Making a report Preparing and making presentations Midterm and revision for midterm Final exam and revision for final exam		
Assessment Criteria		Number(s)	Weight (%)
	Midterm exam	1	20
	Assignment	5	20
	Application		
	Project	1	20
	Practice		
	Quiz		
	Final exam	1	40

	Total	8	100					
Workload of the Course	Activity	Number of Weeks	Duration (Weekly Hour)	End of Semester Total Workload				
	Weekly theoretical course hours	14	3	42				
	Weekly practical course hours							
	Reading activities	8	4	32				
	Internet search and library work	8	4	32				
	Designing and implementing materials	12	1	12				
	Making a report	1	3	3				
	Preparing and making presentations	1	4	4				
	Midterm and revision for midterm	1	10	10				
	Final exam and revision for final exam	1	15	15				
	Total workload			150				
	Total workload/ 25			6				
	Course Credit (ECTS)			6				
Contribution Level between Course Outcomes and Program Outcomes	No	Program Outcomes	1	2	3	4	5	
	1	Knowledge of mathematics, science, basic engineering, computing, and computer engineering; ability to use this knowledge in solving complex engineering problems.					X	
	2	Ability to define, formulate and analyze complex engineering problems using basic science, mathematics and engineering knowledge and considering the UN Sustainable Development Goals relevant to the problems addressed.				X		
	3	Ability to design creative solutions to complex engineering problems; ability to design complex systems, processes, devices, software, algorithms or products to meet current and future requirements, considering realistic constraints and conditions.					X	
	4	Ability to select, use and develop appropriate techniques, resources and modern engineering and informatics tools, including estimation and modeling, for the analysis and solution of complex engineering problems while being aware of their limitations.					X	
	5	Ability to use research methods to examine complex engineering problems or research topics in computer engineering, including reviewing the literature, designing experiments, conducting experiments, collecting data, analyzing and interpreting results.					X	
	6	Knowledge of the effects of engineering practices and the standards used in these practices on society, health and safety, economy, sustainability and environment within the scope of the UN Sustainable Development Goals; awareness of the consequences of engineering solutions in the fields of information security and law.		X				
	7	Acting in accordance with engineering professional principles and knowledge on ethical responsibility; awareness of acting impartially, without discrimination on any		X				

		issue, and being inclusive of diversity.					
	8	Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).				X	
	9	Ability to conduct effective verbal and written communication on technical issues in Turkish or English, prepare reports, make effective presentations and prepare software documentation, considering the various differences of the target audience (such as education, language, profession).					X
	10	Knowledge of business practices such as project, risk and change management and economic feasibility analysis; awareness of entrepreneurship and innovation.					
	11	Lifelong learning skill that includes the ability to learn independently and continuously, to adapt to new and developing scientific practices and technologies, and to think inquisitively about technological changes.					X
Lecturer(s) and Contact Information	Computer Engineering Department Chair bmbb@gazi.edu.tr
