	COURSE DESC	RIPTION FO	DRM					
Course Code and Name	CENG374 INTRODUCTION TO COMPUTER SECURITY (TECH.ELECT.)							
Course Semester	6							
Catalogue Data of the Course (Course Content)	cryptography, electronic sidutabase and operating syst	damentals of information security, information security standards, introduction to otography, electronic signature, key distribution, authentication, access control, abase and operating system security, software security, malware, network security, usion detection, web and e-mail security						
Course Textbooks	Introduction to Computer Security, Michael Goodrich, Roberto Tamassia, Pearson, 2010.							
Supplementary Textbooks	Computer Security Fundamentals (Prentice Hall Security Series) by Chuck Easttom, 2005. Security in Computing, Charles R. Pfleeger and Shari Lawrence Pfleeger, Prentice Hall, 2006.							
Credit (ECTS)	6							
Prerequisites for the Course (Attendance Requirements)	There is no prerequisite or c	o-requisite for	this course.					
Course Type	Elective							
Language of Instruction	English							
Course Objectives	To teach the precautions to threats.	be taken to en	sure computer security by focusing on current					
Course Learning Outcomes	 Defines the basic elements of information security. Explains information security threats and precautions that can be taken. Explains the working principles of basic encryption methods. 							
Instruction Method (Face-to-face, Distance education etc.)	The mode of delivery of this	s course is face	to face.					
Weekly Schedule of the Course	Week 1: Introduction to Info Week 2: Fundamentals of Ir Week 3: Information Securi Week 4: Classification of TI Week 5: Introduction to Cry Week 6: Symmetric Encryp Week 7: Asymmetric Encryp Week 8: Message Authentic Week 9: User Authenticatio Week 10: Database and Ope Week 11: Software Security Week 12: Malware and Defo Week 13: Attack Detection Week 14: Web and Email So	aformation Secty Standards and Type ptography tion and Crypte ption and Access Carating System tense Methods	urity nd Risk Management es of Attacks ographic Attacks Control					
Teaching Activities (The time spent for the activities listed here will determine the amount of credit required)	Weekly theoretical course hours: 3 Internet search and library work Designing and implementing materials Making a report Preparing and making presentations Midterm and revision for midterm Final exam and revision for final exam							
		Number(s)	Weight (%)					
Assessment Criteria	Midterm exam	1	30					
	Assignment	2	10					
	Application Project	1	20					
	11 110,000	1	20					

	Practice										
	Quiz										
	Final exam		1	40							
	Total		5	100							
Workload of the Course	Activity		Number of Weeks	Duration (Weekly Hour)		End of Semester Total Workload					
	Weekly the	Weekly theoretical course hours		14	3	-	42	2			
	Weekly practical course hours										
	Reading activities										
	Internet search and library work		12	1		12	?

Lecturer(s) and Contact Information		. Prof. Dr. M. Sedef DEMİRCİ unduz@gazi.edu.tr		
	11	Lifelong learning skill that includes the ability to learn independently and continuously, to adapt to new and developing scientific practices and technologies, and to think inquisitively about technological changes.	X	
	10	Knowledge of business practices such as project, risk and change management and economic feasibility analysis; awareness of entrepreneurship and innovation.	X	
	9	Ability to conduct effective verbal and written communication on technical issues in Turkish or English, prepare reports, make effective presentations and prepare software documentation, considering the various differences of the target audience (such as education, language, profession).		X
	8	ethical responsibility; awareness of acting impartially, without discrimination on any issue, and being inclusive of diversity. Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).	X	
	8	issue, and being inclusive of diversity. Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).	X
