

COURSE DESCRIPTION FORM			
Course Code and Name	CENG363 WEB BASED TECHNOLOGIES (TECH.ELECT.)		
Course Semester	5		
Catalogue Data of the Course (Course Content)	Basic concepts, Internet, client/server technologies, current web technologies, internet protocols		
Course Textbooks	Emerging Internet-Based Technologies, 2019, CRC press. Web-Based Learning and Teaching Technologies: Opportunities and Challenges, Anil Aggarwal, Information Science Reference, 2000.		
Supplementary Textbooks	Web Technology: A Developer's Perspective, PHI Learning, 2014.		
Credit (ECTS)	6		
Prerequisites for the Course (Attendance Requirements)	There is no prerequisite or co-requisite for this course.		
Course Type	Technical Elective		
Language of Instruction	English		
Course Objectives	To introduce the basic concepts and applications of the structure of web-based technologies		
Course Learning Outcomes	<ol style="list-style-type: none"> 1. Performs advanced database operations. 2. Implements Internet protocols. 3. Develops web-based applications. 		
Instruction Method (Face-to-face, Distance education etc.)	This course will only face-to-face training.		
Weekly Schedule of the Course	<p>Week 1: Internet and client/server Technologies</p> <p>Week 2: Internet information systems</p> <p>Week 3: Internet information systems</p> <p>Week 4: Web browsers and servers</p> <p>Week 5: Web browsers and servers</p> <p>Week 6: Client and server side languages</p> <p>Week 7: Web databases and XML</p> <p>Week 8: Web databases and XML</p> <p>Week 9: Basic Internet applications and protocols: DNS, HTTP, POP3, SMTP, FTP, P2P, IRC etc.</p> <p>Week 10: Basic Internet applications and protocols: DNS, HTTP, POP3, SMTP, FTP, P2P, IRC etc.</p> <p>Week 11: Data Networks</p> <p>Week 12: OSI layers</p> <p>Week 13: Wireless and mobile Networks</p> <p>Week 14: Wireless and mobile Networks</p>		
Teaching Activities (The time spent for the activities listed here will determine the amount of credit required)	<p>Weekly theoretical course hours: 3</p> <p>Reading activities</p> <p>Internet search and library work</p> <p>Midterm and revision for midterm</p> <p>Final exam and revision for final exam</p>		
Assessment Criteria		Number(s)	Weight (%)
	Midterm exam	1	30
	Assignment	5	30
	Application	0	0
	Project	0	0
	Practice	0	0
	Quiz	0	0

	Final exam	1	40						
	Total	7	100						
Workload of the Course	Activity	Number of Weeks	Duration (Weekly Hour)	End of Semester Total Workload					
	Weekly theoretical course hours	14	3	42					
	Weekly practical course hours	0	0	0					
	Reading activities	14	3	42					
	Internet search and library work	14	3	42					
	Designing and implementing materials	0	0	0					
	Making a report	0	0	0					
	Preparing and making presentations	0	0	0					
	Midterm and revision for midterm	1	12	12					
	Final exam and revision for final exam	1	12	12					
	Total workload			150					
	Total workload/ 25			6					
	Course Credit (ECTS)			6					
Contribution Level between Course Outcomes and Program Outcomes	No	Program Outcomes			1	2	3	4	5
	1	Knowledge of mathematics, science, basic engineering, computing, and computer engineering; ability to use this knowledge in solving complex engineering problems.					x		
	2	Ability to define, formulate and analyze complex engineering problems using basic science, mathematics and engineering knowledge and considering the UN Sustainable Development Goals relevant to the problems addressed.				x			
	3	Ability to design creative solutions to complex engineering problems; ability to design complex systems, processes, devices, software, algorithms or products to meet current and future requirements, considering realistic constraints and conditions.					x		
	4	Ability to select, use and develop appropriate techniques, resources and modern engineering and informatics tools, including estimation and modeling, for the analysis and solution of complex engineering problems while being aware of their limitations.					x		
	5	Ability to use research methods to examine complex engineering problems or research topics in computer engineering, including reviewing the literature, designing experiments, conducting experiments, collecting data, analyzing and interpreting results.				x			
	6	Knowledge of the effects of engineering practices and the standards used in these practices on society, health and safety, economy, sustainability and environment within the scope of the UN Sustainable Development Goals; awareness of the consequences of engineering solutions in the fields of information security and law.							
	7	Acting in accordance with engineering professional principles and knowledge on ethical responsibility; awareness of acting impartially, without discrimination on any issue, and being inclusive of diversity.							

	8	Ability to work effectively individually and as a team member or leader in intradisciplinary and multidisciplinary teams (face-to-face, remote, or hybrid).					
	9	Ability to conduct effective verbal and written communication on technical issues in Turkish or English, prepare reports, make effective presentations and prepare software documentation, considering the various differences of the target audience (such as education, language, profession).					
	10	Knowledge of business practices such as project, risk and change management and economic feasibility analysis; awareness of entrepreneurship and innovation.					
	11	Lifelong learning skill that includes the ability to learn independently and continuously, to adapt to new and developing scientific practices and technologies, and to think inquisitively about technological changes.		x			
Lecturer(s) and Contact Information	Lecturer Dr. Bilgehan Arslan bilgehanarslan@gazi.edu.tr
