

Gazi University Education-Training Policy

Our university adopts the following as its education-training policy:

- ✓ To implement sustainable, innovative, and technologically advanced materials and training programs in line with international standards in education and training,
- ✓ To raise individuals who contribute to scientific developments, are prone to interdisciplinary teamwork, and can transform human and economic added value,
- ✓ To adopt an active learning approach based on continuous improvement and high application skills,
- ✓ To create an education and training environment that supports personal and social development,
- ✓ To adopt the basis of skills and competencies as well as knowledge in the success monitoring and evaluation process,
- ✓ To manage education and training processes by the "Planning-Implementation-Controlling-Precaution" (PICP) cycle.
