

## Gazi University Energy Policy

Within the scope of our services;

- ✓ To reduce energy costs by adapting existing applications to energy efficient and low operating cost technologies by the legislation,
- ✓ To separate recyclable wastes and convert them into energy production and to protect the environment by eliminating other wastes,
- ✓ To set rational goals and objectives to increase the efficiency and sustainability of the energy management system and performance, to continuously improve and adapt processes to achieve these goals,
- ✓ To continuously improve and review the effectiveness and performance of the Energy Management System by national and international standards,
- ✓ To increase the awareness of our staff and students through training on energy saving and efficiency and green university practices and to support their habits of using energy efficiently,
- ✓ To follow technological developments and innovations, to consider energy efficiency and environmentally friendly features in product and service procurement, to contribute to sustainable production through efficient use of energy and materials,
- ✓ To monitor and take measures to reduce the carbon footprint created within the scope of energy-based staff and student activities within the university campus,
- ✓ To support projects and scientific studies proposed for the realization of the transformation to renewable energy sources based on the energy consuming producer model,
- ✓ To support scientific studies for the development of all kinds of domestic and national energy production technologies,
- ✓ To provide information support and raise awareness of our participants for the efficient use of energy in all their work in line with our energy policy,
- ✓ To provide the necessary information and support to achieve our goals and objectives,

As Gazi University, we undertake that we will carry out our activities by providing the necessary resources within an energy management system based on continuous improvement within the framework of national and international legal legislation and regulations.
