Gazi University Risk Policy

Gazi University's risk policy is to establish a systematic management system that will ensure the identification, grouping, assessment, control and minimization of risks that may prevent the achievement of its management processes and strategic goals and objectives. Under this policy, our University adopts the following principles;

- ✓ Defining responsibilities related to risk management in all units, identifying those responsible, ensuring their active participation in the process and supervising them,
- ✓ Carrying out training activities to increase the risk awareness and knowledge of officials in all units,
- ✓ Monitoring the updates and innovations made in the legislation and ensuring compliance,
- ✓ Conducting an effective risk management process together with stakeholders,
