

**PEDIATRICS CLERKSHIP PROGRAM**  
**GRADE IV**  
**(29.04.2019 – 12.07.2019)**

Welcome to the pediatrics clerkship program.

Between 07.05.2019 – 22.05.2019 at 14.00 – 16.00 hours you will practice on pediatric history taking and physical examination (Propedeutics).

After that time at 14.00 –16.00 you will practice clinical skills with the designated lecturer. Every student has to take the history and examine at least two patients and discuss them with her/his supervisor and should give the written reports at the end of the program. However feel free to contact your supervisor at any time for any reason.

You have to fully attend and complete the program, however in case of an excuse you are expected to complete the practice for the session you have missed in clinical skills (make up practice) within the following weekend within the responsibility of the chief resident. Yet if you are unable to attend more than + 20 % of clinical practices (even though you have already accomplished a make-up practice) and have missed more than 30 % of lectures the clerkship program is accepted as incomplete and you fail.

During the program there would be mid-day meetings that you are obliged to attend and in which your presence should be documented by your signature.

The responsible professor of the program is Dr.Ülker Koçak

We wish you the best during the training

PEDIATRICS

Lessons would be performed in Room **No: 8** (Dean's Office building basement)
