# FIELDS OF RESEARCH

- The Public Health Master's and Doctorate Programs affiliated with the Institute of Health Sciences are conducted by the Department of Public Health, one of the internal disciplines of medical science.
- Public health is a branch of science that considers the person with his/her entire environment, sees his/her health as his/her responsibility from pre-birth to death, works to eliminate the negative factors in the physical, biological, social, cultural, economic and psychological environment that play a role in the formation of diseases and to create a positive environment, and tries to find, diagnose and treat patients at an early age.
- It includes organized activities for the prevention of diseases, prolongation of life and development of health.
- Its programs include elective and compulsory courses for topics covering basic and advanced epidemiology, biostatistics, health management, health manpower, maternal and child health, health education, health economics, reproductive health, occupational health, community nutrition, family planning, epidemiology of infectious diseases and interdisciplinary approaches of epidemics, school health and health services.
